ABOUT ME

Creative and detail-oriented Front-End Developer specializing in responsive, user-focused web applications. Skilled in React.js, Redux Toolkit, React Query, Material UI, and modern web technologies. Experienced in full-stack development with Laravel, RESTful APIs, and MySQL, enabling seamless client-server integration. Passionate about continuous learning, delivering high-performance, scalable, and maintainable solutions.

EDUCATION

- **Bachelor's Degree in Computer Science | 2021-2025**

Faculty of Computer Science, Menoufia University, Egypt

GPA: 3.0/ 4.0

- **INSTANT Academy** 2024

- Frontend Development Diploma (React.js)
- Comprehensive training in modern frontend development with React.js.

PROJECTS

- **TravelVerse – Booking Platform (Graduation Project)** [Frontend](#) – [Backend](#)

A scalable full-stack travel booking platform that enables users to explore destinations and book trips, hotels, flights, cruises, restaurants, cars, and activities through a unified and high-performance system.

Key Contributions:

- Built a modular React SPA with reusable components, responsive UI (Material UI), and modern UX principles.
- Implemented advanced state management with Redux Toolkit and server-state caching with React Query.
- Integrated REST APIs via Axios with proper loading, error handling, and dynamic features like favorites and cart.
- Designed a complete booking workflow with cart, favorites, and user management, applying performance optimizations (lazy loading, optimized rendering) and clean architecture principles.
- Developed backend Laravel APIs with MySQL, following MVC architecture, handling authentication (JWT/Sanctum), CRUD operations, and complex relationships (e.g., polymorphic associations).

Tech Stack: React.js • Redux Toolkit • React Query • Material UI • Axios • Laravel (REST API)
• MySQL • MVC Architecture • Eloquent ORM • Authentication & Authorization

- **Ecommerce-Website – Modern React E-Commerce App** [GitHub](#) – [Demo](#)

A production-ready e-commerce web application built with React and Vite, designed as a scalable and responsive online store with modern frontend practices.

Key Contributions :

- Built a React SPA with modular components and responsive mobile-first UI using Tailwind CSS.
- Managed global and server state with Redux Toolkit and React Query for performance and seamless UX.
- Implemented dynamic product listings, filtering, sorting, and detail pages with client-side routing (React Router).
- Enhanced UX with lazy loading, placeholders, dark mode, cart/wishlist, and toast notifications.
- Optimized performance and build using Vite.

Tech Stack: React.js • Vite • Tailwind CSS • Redux Toolkit • React Query • React Router • SPA Architecture • Client-side Routing • Performance Optimization

- **AdminDash – Admin Dashboard Web Application** [GitHub](#) – [Demo](#)

A modern and high-performance admin dashboard built with React and Vite, designed for managing users, products, orders, and analytics. The project features a scalable architecture, reusable components, and real-world dashboard functionalities suitable for e-commerce and SaaS platforms.

Key Contributions

- Built a React.js SPA with modular reusable components for scalable dashboard architecture.
- Implemented centralized state management using Redux Toolkit.
- Integrated server-state fetching and caching using TanStack Query (React Query).
- Developed interactive data visualizations and analytics with charts.
- Built advanced data tables with search, filtering, pagination, and inline editing.
- Designed responsive layout with Tailwind CSS and dark-light mode support.

Tech Stack: React.js • Vite • Redux Toolkit • TanStack Query (React Query) • React Router • Tailwind CSS • Recharts / ApexCharts • Data Table UI Components

- **Astronova – NASA Space Apps Challenge (1st Place Winner)** [GitHub](#) – [Linkedin](#)

Built an interactive educational web platform focused on space exploration, enabling users to explore planets, discover space missions, and access real-time space data via integrated public APIs.

Key Contributions:

- Integrated real-time space data APIs for dynamic content rendering.
- Designed responsive and user-friendly UI using Bootstrap.
- Implemented interactive data visualization and mission exploration features.
- Structured clean and maintainable front-end architecture.
- Contributed to the project that secured 1st Place in NASA Space Apps Challenge.

Tech Stack: HTML • CSS • JavaScript • Bootstrap • Public APIs

INTERNSHIP EXPERIENCE

Feb 2024 – Sep 2024 (120 hours)

- **INSTANT – Web Development Using React.js**

- Intensive frontend course covering HTML5, CSS3, JavaScript (ES6), Bootstrap, and React.js
- Built multiple responsive web apps and practiced component-based architecture

TECHNICAL SKILLS

- **Frontend Development:** React.js, JavaScript (ES6+), HTML5, CSS3
- **UI Frameworks & Libraries:** Tailwind CSS, Bootstrap, Material UI, Shadcn UI
- **State Management:** Context API, Redux, TanStack Query (React Query)
- **Form Management:** React Hook Form, Formik, Zod, Yup
- **Version Control & Deployment:** Git, GitHub, Vercel
- **Design & Tools:** Responsive Design, Figma, VS Code, Postman, Chrome DevTools
- **Best Practices:** Clean Code, Clean Architecture

ADDITIONAL INFORMATION

Languages:

- Arabic: Native proficiency
- English: Intermediate

Soft Skills:

- Problem-solving, attention to detail, time management
- Effective communication, teamwork, adaptability
- Self-motivated learner with strong analytical skills
